SUMMARY

Full-stack SDE Intern candidate with expertise in Python, AI/ML, Node.js, and DSA. Experienced in building production grade systems using FastAPI, React.js, LangGraph, and Docker. 2× hackathon 2nd prize winner with research experience in NLP and Deep learning.

EDUCATION

Indian Institute of Information Technology, Dharwad

Aug 2023 – Present

Bachelor of Engineering in Computer Science and Technology | CGPA: 8.55/10

WORK EXPERIENCE

IIIT Dharwad

Jan 2026 – Apr 2026

NLP & Speech Researcher — Indic Conversational Intelligence Platform

Dharwad, Karnataka

- Built a **speech-to-structured-data pipeline** for code-mixed Indic audio using **IndicConformer** and **IndicTrans2**; applied **30s micro-chunking** via torchaudio to eliminate hallucination loops across 78 files.
- Benchmarked 2 ASR and 7 DER architectures, exposing **WER volatility** and phonetic hallucinations in **SeamlessM4T** versus superior dialectal resilience of Indic-specific models.

NIT Durgapur

May 2025 – Aug 2025

Research Intern

Durgapur, West Bengal

- Trained **CNNs on EEG ERSP spectrograms** for cognitive workload classification under Prof. Tandra Pal, where systematized epoch labeling and spectrogram generation in **MATLAB** with **PyTorch** dataloaders.
- Achieved reliable **0/1/2-back working memory discrimination** from EEG signals, validating a fully passive cognitive state monitoring pipeline.

PROJECTS

B2B Invoice Payment Delay Predictor | Full-Stack Developer & Researcher

[GitHub](#)

Python, XGBoost, Optuna, FastAPI, React 19, Playwright, Pandas, SMOTE | Lead Developer

May 2026

- Automated end-to-end data Scraping of 5 years of **MSME Samadhaan** data via **Playwright** and trained an **XGBoost** model with **Optuna/SMOTE** (**88% recall**), proving financial health has **0% predictive weight** vs. listing status (**48%**) and sector (**52%**).
- Developed a glassmorphic dashboard in **React 19** and **FastAPI** on Vercel, featuring real-time prediction charts (**Recharts**), mechanized CSV batch processors, and custom risk-mitigation advice for small suppliers.

WikiSentinel: Real-Time Vandalism Detection | 2nd Place – Singularity 2.0, IIT Dharwad

[GitHub](#)

Python, Llama 3, Docker, Pathway, Agentic RAG, React | Lead Backend

Jan 2026

- Made a **Kappa Architecture** pipeline via **Pathway** processing **300+ Wikipedia edits/min**, integrated **Llama 3** Agentic RAG with Tavily API to cross-verify edits, cutting false positives by **40%**.
- Deployed **Gemini Vision** for real-time NSFW detection; containerized full microservices stack with **Docker**.

InsureClear: Vectorless Insurance Policy Checker | 2nd Place – Karke Dikha, IIIT Dharwad

[GitHub](#)

Python, TinyBERT, LangGraph, PageIndex, FastAPI, React | AI Engineer

Apr 2026

- Fine-tuned **TinyBERT Cross-Encoder** via **REINFORCE Policy Gradient** achieving **94% Top-1 accuracy**; ingested PDFs as hierarchical JSON trees via **PageIndex SDK**, preserving structure lost in standard RAG.
- Orchestrated a **multi-agent LangGraph** pipeline for domain classification, query expansion, and verdict harmonization — no vector DB overhead.

TECHNICAL SKILLS

Languages: Python, C, C++(DSA), MySQL

AI & Machine Learning: PyTorch, TensorFlow, TensorFlow Lite, Scikit-learn, OpenCV, MediaPipe, NumPy, Pandas, SciPy, Seaborn, SHAP, CNNs, ResNet, LSTMs, Transformers, NLP, Deep Learning, Multi-Task Learning, Generative AI, Vision Transformers (ViT), Agentic RAG, LangGraph, LangChain, TorchGeo

Web & Backend: React.js, TypeScript (learning), Node.js, FastAPI, REST API, WebSockets, WebRTC, Pathway (Kappa Architecture)

Tools & Data: Google Earth Engine, GeoPandas, Rasterio, Shapely, HDF5, DeepMIMO, Power BI, Figma, VS Code, MATLAB, Git

OS, Database & DevOps: Linux, Docker, Firebase (NoSQL), GCP (familiar), GitHub Actions.
